ENCLOSURES – IP PROTECTION SPECIFICATION

The IP system indicates the degree of protection against the ingress of dust and liquids into enclosures in accordance with BS EN 60529, 1992.

The Weald Electronics LMF, LMG, LMH, LMHC, LMV and LMA ranges of connectors and accessories are designed to give a high degree of protection. Tests carried out have proven that using standard parts, a rating of IP68 can be achieved under static, laboratory conditions. This rating depends on the correct selection of components and a high standard of workmanship is applied when assembling piece parts. Weald Electronics does not recommend extended use of these connectors when submerged in liquids.

A handwritten signature in blue ink, appearing to read "S. Hammerton", is written over a horizontal line.

Signed: _____

S. Hammerton
Managing Director
Weald Electronics Ltd

Date: 18.03.2010
